FREE Virtual Dementia Tours® (VDT®)

Thank you Senior Helpers

The VDT is a scientifically proven experience that builds sensitivity and awareness in individuals caring for those with dementia by temporarily altering participants' physical and sensory abilities. This evidenced based program simulates changes associated with cognitive decline. Geriatric specialist, P.K. Beville, authored and invented the VDT as her post-graduate work. This patented program offers hope by providing practical ways to create an environment that supports the better quality of care and increase understanding of those with dementia.

Second Wind Dreams has provided this patented experience to numerous organizations including the Centers for Disease Control (CDC). Second Wind Dreams ensures that elders' dreams are fulfilled ranging from the simple to the sublime.
